I am greatly indebted to our Industry Mentor **Mrs.Vijitha** and **Mr.Mano** & Project guide **Ms.T.Sangeetha** Assistant Professor, Department of Information Technology for their valuable guidance and suggestions in all aspects that aided us to ameliorate our skills.

I am thankful to all those who have directly and indirectly extended their help to us in completing this project work successfully.

ABSTRACT

5G Arena aims to provide a comprehensive evaluation of the mobile sales website. The website offers a wide range of latest 5G from various manufacturers and aims to simplify the mobile buying process for customers.

It focuses on the website's key features, including user interface and navigation, product offerings, customer reviews and ratings, financing options, and customer service and support. It analyzes the advantages and potential areas for improvement of the website, providing valuable insights for the customers.

By evaluating the website's ability to meet the needs and expectations of customers, it aims to provide recommendations on how the website can better serve its audience. It serves as a valuable resource for anyone interested in the online presence and functionality of the mobile sales website.

5G Arena is a useful for people to choose the best device that suits their needs across many devices available in the market and buy that device in this website without much hassle and it serves as a practical example of the application of machine learning algorithms in a real-world setting.
